

Workorders are easier with LOCiS ...

LOCiS Tasks/Workorders allows you to manage all incoming work requests for each department. Automatic reminders, SMS and Email notification ensures nothing falls through the 'cracks'.

- **Web Based**
- **Interface to Utility Billing or City/Village directory**
- **Go green and support sustainability**

Reduce the need to print and file work orders with the web-based and mobile work order management software solution.

- **Stay in-the-know of work progress**

View a report, dashboard or list-view of all open work orders categorized by type, technician, department, and any other user-definable field.

- **Access your Workorders anywhere!**

With any Mobile Device, technicians can access their work orders, log labor hours and notes, and record when work is completed while being connected to the internet in the field.
